

Information sessions

Making files ready for the printing process involves a great deal. For this reason we recommend that you attend an information session of GVO | P+L. There are a number of general information sessions, frequently in association with the PhD student's consultation at your university. But we can also give an information session for groups of five persons or more, who are taking their doctoral degree within 2 years. The information sessions can be held in Dutch or in English.

For this you can get in touch with Françoise Béguin at our printing company in Ede, t: 0318-544034, e: ede@p-l.nl

You only have to provide a suitable room for the number of people who will attend the information session. Participation in the information session is free and creates no obligations. This book will serve as a work of reference during the information sessions.
